

Local Area Information – Les Gorges du Pont du Diable, 30 minutes

Visited as early as 1893 and fitted out to be accessible for most people, the DEVIL'S BRIDGE GORGES offer the visitor a gripping picture of the power of water erosion.

The jagged profile of the gorge sides and their shaded colours give the whole site a weird appearance. Surrounded on all sides by magnificent forests.

The gorge is partly underground, gouged into very hard grey marble. The walk-ways, although steep, are well made and safe!

Not suitable for the very young, elderly or infirm due to steep approaches to the gorge and also the many steps inside.

**Open from May to September
Daily from 9 am to 6 pm**

Average visit time : 45 mins

5.30 Euros for adults and slightly less for children over 6yrs old.
